OUTLOOK & VALUATION

JSW Energy is aggressively scaling its renewable portfolio, positioning itself as a leader in India's energy transition with a clear roadmap to 30 GW capacity by 2030. While recent PAT growth was impacted by higher depreciation and interest costs from rapid capacity expansion, the underlying EBITDA margins remain robust and are expected to expand as new projects reach commercial operation. We

value the stock at a forward P/E of 33x on FY27E earnings, reflecting its strong competitive moat and long-term earnings visibility, justifying a BUY rating.
